

Plastic sheet and tape

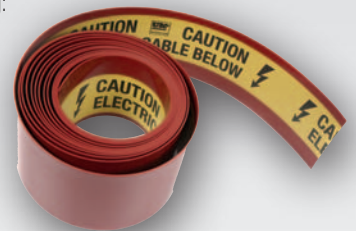

Ekon is the leading producer of [polyethylene](#) (PE) and [polypropylene](#) (PP) sheet and roll material through the flat-die-extrusion process. Other raw materials which can be processed are Biopolymers, Plastomers and TPE's. A combination of different raw materials by co-extrusion is another option.

Ekon was established in 1992 from a DSM subsidiary that started in the early eighties with the recycling of plastics. Years of experience in the processing and use of [recycled plastics](#) has been built up. Ekon makes cost-effective products with a high quality level, based on this experience. Because there are limits to the use of recycled materials, Ekon has also specialized itself in the processing of [virgin raw materials](#). This way we created a wide range of products in both new and recycled materials.

Ekon can also offer fabrications, such as sawing, drilling, welding, milling, punching and bending.

Ekon products are used in diverse markets including:

- Industry
- Animal keeping
- Leisure time
- Transport, warehousing and packaging
- Civil engineering and construction
- Automotive

Our tradenames [Ekoboard](#)[®], [Ekosheet](#)[®], [Ekogrip](#)[®], [Colourgrip](#)[®] and [Ekoprotect](#)[®] are well-known in diverse markets.

If you are looking for a product or component, based on plastic sheet or tape, please ask us. We have a solution or will find one.

Cost-effective quality in plastics

Product range

Ekon grade	PE300	PP	LDPE-E	F-CE	HDPE-C	Specials Raw
Material	Virgin HDPE	Virgin PP-C or PP-H	Recycled LDPE	Recycled PE Mix	Recycled HDPE	TPE Plastomer Biopolymer PE+Rubber PE/PP + Non-woven Co-extrusion
Thickness	0,8 - 12 mm	0,5 - 10 mm	1 - 30 mm	1 - 18 mm	1 - 18 mm	On request
Standard colours	Black Other colours on request	Black White Grey (RAL7032) Other colours on request	Black Dark colours possible	Black Dark colours possible	Black Dark colours possible	On request
Delivery form	Sheets Rolls	Sheets Rolls	Sheets Rolls	Sheets Rolls	Sheets Rolls	Sheets Rolls
Surface Structure (option)	Smooth Grain	Smooth Grain	Smooth Diamond Button	Smooth Diamond Button	Smooth	Smooth

Options

Co-extrusion	A multi-layer product can be made by co-extrusion.
Text/identification	It is possible to mark most of the grades in our product range, by laminating a text film with company name and logo or a warning text.
Protection film	Sheets can be provided with a protection film, to prevent damage in the customers production process. The film is easy to remove.
Additives	On request all products can be provided with several additives like UV-stabilizer, anti-staticum, slipagent, chalk or talcum.
Special grades	Besides the standard product range, Ekon offers tailor-made solutions for your specific application. E.g. specific polymers. Please see our product range for "Specials", or ask for our possibilities.

- Properties Ekon products:
- Sustainable and durable
 - Easy to work with
 - Chemical-resistant
 - Environmentally friendly
 - Easy to clean
 - Recyclable
