

Ekosheet® Slipsheets

Ekosheet® represents a range of high quality plastic sheets for material handling, storage and transport. These PE or PP based products are used as a slipsheet or separation sheet. Ekosheet® can be handled with Push-Pull or Rollerforks® equipment.

The sheets are ideal for multiple use. They save space, are easy to clean and resistant to oil, moisture and chemicals.

As a result of these excellent properties Ekosheet® complies to the international packaging standard ISPM15. Because of the fully closed structure, bacteria don't get grip on the product

Every slipsheet application is different, because of different products, processing, handling equipment and load on the sheet. So there is no standard solution. We supply a custom-made product, according to your specifications.

We would like to discuss your project and offer you a tailor-made slipsheet solution.

Cost-effective quality in plastics

Product range Ekosheet® Slipsheets & Separation sheets
