

Ekogrip & Colourgrip

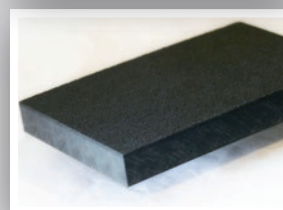

Ekogrip® is a robust polyethylene plate with a 2 mm thick top layer of a virgin thermoplastic elastomer (TPE) with a grain structure. The PE plate provides rigidity and the top layer gives the product a soft-touch and good anti-slip properties. For even better anti-slip properties, also under wet conditions, **Ekogrip®** can be provided with a button structure.

Some examples of applications of **Ekogrip®** are:

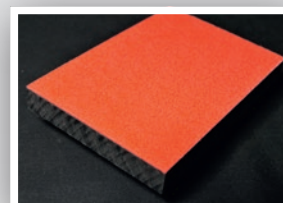

- floors for cargo vehicles
- residential and workplace modifications
- saddles, floors, stairs and climbing walls in playground equipment
- floor heating elements for pig houses

We can supply **Ekogrip®** in the colors black/anthracite and black/black in standard dimensions 3000 x 1500 mm. The standard thicknesses are: 9, 12, 15 and 18 mm.

Colourgrip is the colored variant of **Ekogrip®**: also a robust polyethylene sheet with a 2 mm thick top layer of a virgin thermoplastic elastomer (TPE) with a grain structure. We can supply **Colourgrip** in all kinds of bright colors. To guarantee a good anti-slip under all circumstances, the plate is always provided with this TPE grain top layer and optionally provided with a button structure. **Colourgrip** is mainly used in playground equipment and special flooring applications.

Colourgrip is standard available in the colors black/red, black/yellow and black/blue in dimensions 3000 x 1500 x 18 mm. Different dimensions (minimum thickness = 12 mm) and colours are on request.

Ekogrip® and **Colourgrip** meet the European Standard EN 71-3 for playground equipment.

Advantages Ekogrip®/Colourgrip:

- Good anti-slip properties
- Maintenance free
- No rotting
- Long lifetime
- Sustainable and robust
- Easy to clean
- No splintering
- Chemical-resistant
