

Durable protection for cables and ducts

Ekoprotect® is the brand name for Ekon's product range of cable protection products. Ekon manufactures polyethylene protection tape and tiles in many dimensions and colours for the protection of underground cables, ducts and pipes. The main applications are the protection of high voltage cable, glass-fiber and gas pipes. Besides a variety of standard products, most products are custom-made.

Surface	Smooth	Smooth
Structure (optional)		Diamond

Ekoprotect® offers excellent signalisation and protection. The product can be supplied with your own specific warning text or phone number. Ekoprotect® is manufactured from polyethylene which is perfectly suitable as a quality cable protection product. Because of its toughness, Ekoprotect® offers high resistance to mechanical impacts at excavation work.

On request we can manufacture protection products according to your technical specifications. We are happy to discuss the possibilities for your specific application

Advantages Ekoprotect®:

- Optimal protection
- Chemical-resistant
- Lightweight
- Low transport and handling costs
- Signaling
- Warning text of your choice
